Practice Training Site

The MAVRIC training site (also known as the sandbox) is a practice environment that mimics MAVRIC and is available 24/7.

Usage Recommendations

- The URL is: <https://demo.davema.vitalchek.com/web/Logon.aspx>.
- In the training site, we have established shared, role-based user accounts to assist partners with learning the MAVRIC system. Partners will not have individual accounts in the training site.
- See page 2 for usernames and the one password for everyone.
- The role-based accounts are set up to represent an opt-in community and an opt-out community.
- The training site is configured so multiple users can use these shared accounts concurrently.
- There will be minor user interface differences between the MAVRIC practice training site and the live system, but this will not impact functionality.
- The practice training site will have a different log-on process than the production system. The real, go live system will use multifactor authentication, and more information will be provided closer to go live.
- Please use dummy information when practicing in the training site. Don't use real decedent information, especially social security numbers.
- Write down case ID numbers of any records you create and/or modify so you can ask any questions of the RVRS' technology team.
- Need help getting started? Please refer to the role-specific instruction guides to help with sandbox activities.
