

# Blended Learning Series and Training Plan Comparison Guide

## Blended Learning Series

- A Blended Learning Series is a **course type** in TRAIN that allows Course Providers to bundle a collection of courses designed to address specific gaps in knowledge, skills, and competence. Like other courses, Blending Learning Series are created using the Course Wizard.

## Training Plan

- A Training Plan is a **collection of courses** designed to address specific gaps in knowledge, skills, and competence. They are created using the Training Plan Wizard. View the [Training Plan Management](#) user guide for more details.

	Blended Learning Series	Training Plans
Registration Management	Course Providers can view and edit BLS registration details. View the <a href="#">Course Roster Management</a> user guide for more details.	Registration Management is not available within Training Plans.
Competencies and Capabilities	Course Providers can add available competency and capability sets to improve the search, navigation, and completion of the course for users.	Competencies and capabilities are not available within Training Plans.
Assessments and Evaluations	Course Providers can assign preexisting and/or newly developed assessments and evaluations to a Blended Learning Series.	Assessments and evaluations are not available within a Training Plan. However, Course Providers can create an assessment and/or evaluation and assign it to a required course within a Training Plan.
Reports	Through the Course Roster, Course Providers have access to reports. These include the <a href="#">Abbreviated Roster Report</a> , Roster Report, assessment results, and evaluation results.	Training Plan managers have access to three reports: (1) the Training Plan Progress Details Report; (2) the Training Plan Progress Summary Graphs Report; and (3) the Training Plan Summary Report. View the <a href="#">Training Plan Reporting</a> user guide for more details.
